OBJECTIVE

Dedicated Mechanical Maintenance Technician aiming to support operations by ensuring equipment reliability, minimizing downtime, and maintaining high safety standards in industrial and oil & gas environments.

SKILLS

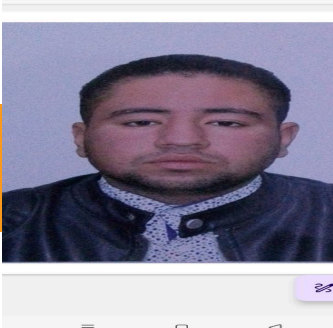

- Preventive and Corrective Maintenance of Mechanical Systems
- Troubleshooting and Fault Diagnosis on Industrial Equipment
- Installation, Alignment, and Calibration of Mechanical Components
- Knowledge of Hydraulic, Pneumatic, and Lubrication Systems
- Reading and Interpreting Technical Drawings and Equipment Manuals
- Using Hand Tools, Power Tools, and Precision Measuring Instruments

LANGUAGE

- ✓ English intermediate
- french advanced

ACTIVITIES

- Preventive and corrective maintenance of mech
- Equipment inspection, troubleshooting, and fault d
- Mechanical assembly, disassembly, and componen
- Daily monitoring and reporting of machine perform
- Teamwork with multidisciplinary maintenance tear
- Reading and interpreting mechanical drawings and
- Coordination during shutdown and restart procedu
- Spare parts management (stock control, ordering,

EXPERIENCE

sonatrach	2020 - 2025
peccos	
mechanical maintenance technician	
Perform regular preventive maintenance on mechanical equipment and machines.	
Diagnose mechanical problems and identify faulty components using technical manuals and diagnostic tools.	
Repair, replace, or adjust defective parts such as bearings, gears, seals, pumps, and valves.	
Conduct equipment testing and calibration to ensure proper functionality.	
Keep maintenance records, report work activities, and document repairs.	
Follow workplace safety procedures and ensure compliance with health and safety regulations.	
Collaborate with engineers, supervisors, and other maintenance staff to solve technical issues and improve machine performance.	
Work with hydraulic and pneumatic systems, performing maintenance on hoses, actuators, cylinders, and control valves.	
Ensure compliance with safety standards, work permits, and maintenance procedures (PTW, LOTO, HSE rules).	
Record maintenance activities, prepare daily job reports, and communicate equipment status to supervisors and engineers.	
Collaborate with operations teams to minimize downtime and optimize machine performance.	
maintain machinery and heavy mechanical equipment, such as conveyor systems in diverse settings including repair shops, plants, construction sites, mines, logging operations, ski hills and most production and manufacturing facilities.	
Maintain and repair gas and steam turbines, including alignment, balancing of rotating assemblies, replacement of bearings, seals, and inspection of lubrication and cooling systems.	
Service pumps, compressors, gearboxes, hydraulic systems, and conveyors,	

EDUCATION

mahdjoubi Daoudi institut
Bachelor in mechanical engineering
